

WILL Technology Celebrates 10 Years

It was 10 years ago that WILL Technology had only one employee in Huntsville. Now the company has 100 employees in Virginia, North Carolina, and Florida with satellite locations in Colorado, Nebraska, Puerto Rico, Alaska, and the Kwajalein Islands serving numerous government clients.

“10 years is a major milestone for WILL Technology. The corporate team is the real backbone of the company,” said Crystal Shell, founder, president and CEO of WILL Technology (*shown above*).

Ron Poteat, secretary/treasurer of the Chamber of Commerce of Huntsville/Madison County Board of Directors, said that WILL Technology is representative of the spirit of success in Huntsville.

“I can tell you that WILL Technology embodies the very spirit of success — and illustrates what is so unique and good about our community and why our community receives such positive national recognition,” said Poteat.

Huntsville Mayor Tommy Battle said that WILL is among the many successes in Huntsville.

“This is just one more great example of the many magical stories of Huntsville,” Battle said. •
